

FLYING SAFE DURING COVID-19

BEFORE LEAVING YOUR HOME

- ✓ Check reopen.eu for travel updates and COVID-19 related travel restrictions.
- ✓ Check-in online and fill out any necessary travel documents in advance.
- ✓ Bring a sufficient supply of face masks -- they are mandatory on all flights.
- ✓ **Don't go to the airport** if you have fever, cough, shortness of breath or loss of taste or smell.

AT THE AIRPORT

- ✓ Always wear your face mask & wash/sanitize your hands often.
- ✓ Keep your distance (1.5 m) from other travellers (security lines, terminals, boarding).
- ✓ Follow the rules and procedures as directed by airport staff.
- ✓ Be at your gate on time.

DURING YOUR FLIGHT

- ✓ Be patient during boarding and always follow the advice of the cabin crew.
- ✓ Make use of digital newspapers & magazines if available.
- ✓ Always wear your mask & wash/sanitize your hands.
- ✓ Limit your movement in the cabin.

Infobox

The risk of catching an infection onboard is extremely low - much lower than in a shopping centre, or even your office. Cabin air is replaced with fresh air every 2-3 minutes and is filtered using hospital-grade HEPA systems, which catch 99.9% of viruses and germs. Learn more [here](#).

ARRIVAL AT YOUR DESTINATION

- ✓ Be patient and try to keep a safe distance during disembarkation.
- ✓ Follow health measures and guidance from local authorities.
- ✓ Avoid any physical contact and always keep your distance (1.5 m).
- ✓ Complete any forms requested by your country of residence before your return.
